Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cox '758 in view of Martinez et al. '909. Cox discloses all the limitations of the claims including a bumper (26). However, Cox fails to disclose weakened regions between slits/leaflets. Martinez et al. disclose a implant delivery system including an elongate tubular outer sheath having a distal end configured to prevent trauma when inserted into a vessel, the distal end including a plurality of flexible leaflets being deflectable from a closed position to an open configuration and the leaflets are connected to one another by weakened regions and the weakened regions being tearable for deploying an implant (col. 4, lines 6-64). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ weakened regions between the plurality of flexible slits/leaflets of Cox's sheath in order to prevent the leaflets from flaring out and damaging the wall of a blood vessel during advancing Cox's delivery system into a vessel.

The introductory statement of intended use and all other functional statements for example "without exposure to a softening liquid" have been carefully considered but are deemed not to impose any structural limitations on

the claims distinguishable over the device of Cox in view of Martinez which is capable of being used as claimed if one desires to do so.

Allowable Subject Matter

3. Claims 10-20, 37 and 39 are allowed.
